

## **Senior Analyst**

Exeter Associates, Inc., an economics consulting firm located in Columbia, Maryland, is seeking to hire a senior analyst. The successful candidate will have strong quantitative skills, at least a Master's degree in economics or a related field, at least five years experience in the electric power industry, and strong experience with spreadsheet applications and analysis. Knowledge and practice of statistical and econometric analysis and experience testifying before state and/or federal regulatory commissions are preferred but not required.

Exeter Associates performs economic and regulatory analysis, regulatory testimony, policy analysis, and options studies for state and federal government agencies. Exeter's clients include the U.S. Department of Energy, the National Renewable Energy Laboratory, the Maryland Department of Natural Resources, the Maryland Energy Administration, the U.S. Department of Defense, the Pennsylvania Office of Consumer Advocate, the Maine Office of Public Advocate, the Louisiana Public Service Commission, and other state and federal agencies.

The successful candidate will work on a variety of projects, both independently and as part of a team, including class cost-of-service studies, life-cycle cost analysis, options studies, policy analysis, and assistance in utility contract negotiations. It is anticipated that the successful candidate will also testify as an expert witness in utility regulatory proceedings before state and federal commissions on class cost-of-service and rate design issues, and potentially other issues.

Exeter offers a competitive salary, an excellent benefits package, and an informal and collegial work environment. Interested applicants can send a resume and a writing sample to [personnel@exeterassociates.com](mailto:personnel@exeterassociates.com).
